Subject: Re: Light Cabot reading for your train ride home! Interesting about Teel well productivity and the length of horizontals

Bob- I pulled the high values form the recent package for organics, but I don't have the key for where the samples were taken so I just put the sample identifier, I know some are Dissolved/F for filterd, but not sure of most names

PS the last file in the Dimock file- September Part 2 is actually a piece of the Part 1 September data it is a duplicate of mapes 108-about 196. Part 1 goes though 216 of 2137. Thanks!
